RELEVANT EXPERIENCE

Netway Computers | Perth, Western Australia

May 2023 - Present

IT Technician

- Diagnosed and resolved hardware/software issues for **20+ clients weekly**, improving system uptime and customer satisfaction.
- Installed, configured, and maintained computer systems and small networks to ensure optimal performance.
- Communicated technical concepts clearly to non-technical clients, improving customer understanding and trust.
- Rebranded the company's **Shopify** storefront, utilising AI-driven enhancements and custom **HTML/CSS** to deliver a modern, improved user experience.

AI Automation Consultant | Freelance, Perth Western Australia

2026 - Present

Founder

- Founded a freelance AI automation consultancy delivering workflow automation solutions to local Perth businesses using **Claude Code, Make.com, Twilio, and Google Apps Script**
- Built a custom web application in **JavaScript** for real-time job tracking with **automated SMS notifications**, reducing manual customer follow-up for service business clients
- Automated **45 customer notifications per week**, eliminating an estimated **1 hour** of staff time.

PROJECTS

AI Resume Assistant | Personal Project

January 2026 - February 2026

- Built a full-stack AI resume analysis platform integrating **Groq API** to generate real-time, structured feedback from uploaded PDFs
- Implemented a **RESTful backend with MySQL** and stateful chat by reconstructing conversation history, paired with a React frontend using hooks and context
